Name	: MS. SHEEBA SANTOS	Lab Id	: 2030112873
DOB/Age	: 01-Oct-1988 / 33 Years	Gender	: Female
Referred By	:	Passport	: P0496788B
Referral Clinic	: GSM Medical center L.L.C	Nationality	: Philippines
Emirates ID	:	Ref Clinic Id	: 290
Reg Date	: 26-Mar-2022 01:05	Hasana Id	: 5641078
Coll. Date	: 25-Mar-2022 19:29	Pt Clinic Id	: GSM/N/16396
		Rec. Date	: 25-Mar-2022 19:29
		Reporting	: 26-Mar-2022 07:17
		Report Status	: Final

TEST	RESULTS	UNIT	BIOLOGICAL REF RANGE	REMARKS
------	---------	------	----------------------	---------

Molecular Microbiology

SARS-COV-2 Virus (Covid 19) **Not Detected (Negative)** Not Detected

Method: RT-PCR

Sample Source: Nasopharyngeal

INTERPRETATION

Not Detected (Negative) result indicates SARS-Cov2-Virus not present in specimen. Results do not rule out the presence of PCR inhibitors, mutations in the patient specimen or assay specific nucleic acid in concentrations below the level of detection by the assay.

Detected (Positive) results are indicative of the presence of SARS-CoV-2 RNA in specimen submitted. Due to the complexity of nucleic acid amplification methodologies, there may be a risk of false positive results. Clinical correlation with patient history and other diagnostic information is necessary to determine patient infection status.

Presumptive Positive result indicates that one of multiple gene is detected or a low viral load is possible. Patient needs to self-quarantine and the sample should be repeated in 72 hours for confirmation with clinical correlation

Note: Reliable results are dependent on adequate specimen collection, transport, storage, and handling. The Covid test conducted as per Kit approved by DHA
